SUMMARY

Full Stack Software Engineer with 5+ years of experience designing and building scalable SaaS platforms, RESTful APIs, and multi-tenant architectures. Currently building PropAI OS, an AI-powered real estate operating system for US brokerages, enforcing tenant isolation with PostgreSQL Row-Level Security and powering semantic search with pgvector. Proficient in Next.js, React, TypeScript, Node.js, Fastify, PostgreSQL, Drizzle ORM, and Prisma, applying Clean Architecture, DDD, and API-first design principles. Experienced integrating LLMs, computer vision, and embeddings into async, production-grade workflows in Agile/Scrum environments.

EXPERIENCE

MM Tech | Full Stack Engineering & Consulting

Founder & Full Stack Engineer

Dec 2020 - Present · São Paulo, Brazil · Remote

Independent software consultancy delivering full-stack SaaS products end-to-end, covering architecture, backend, frontend, and deployment. Currently building PropAI OS, a multi-tenant SaaS platform for the US real estate market (Turborepo monorepo: Next.js, Fastify, PostgreSQL). Key technical highlights across 16 RLS-protected tables, 37 REST endpoints, and 45 integration tests:

- **Multi-Tenant Architecture:** Enforced tenant isolation at the database level with PostgreSQL Row-Level Security (RLS) integrated through Drizzle ORM, instead of relying on application-level checks alone.
- **Auth & RBAC:** Implemented Better Auth with Organizations for brokerage sign-up, team invites, and role-based access control (owner, manager, agent, viewer).
- **Properties Module:** Built CRUD API with RBAC-scoped filters, presigned image uploads to object storage, interactive map, and photo gallery.
- **Async AI Pipeline:** Designed BullMQ background workers powering four independently feature-flagged AI capabilities so calls never block HTTP requests: computer vision (Gemini) auto-fills property listings from photos, OpenAI embeddings feed pgvector semantic search, and LLM-based lead scoring and price estimation run as independent jobs.
- **Real-Time CRM:** Built a Kanban-style lead pipeline with GSAP FLIP animations and WebSocket-based live updates synced across all users in an organization.
- **Public Marketplace:** Shipped an SEO/SSR property search experience where visitor inquiries flow directly into the CRM as leads.
- **Cost & Reliability Controls:** Feature-flagged each AI capability independently, with rate limiting and deterministic mock responses so the system runs in CI and demos without live API keys or unexpected cost.
- **Monorepo & CI:** Structured a Turborepo monorepo with shared Zod contracts between the Fastify API and two Next.js apps (dashboard + marketplace), enforced by GitHub Actions (lint, typecheck, integration tests) on every PR.

Repo: github.com/MAGAIVERH/propai-os

Stack: Next.js 15, React, TypeScript, Fastify, PostgreSQL (Neon), Drizzle ORM, pgvector, Better Auth, BullMQ, Redis, Vercel AI SDK, Turborepo

SKILLS

Next.js | React | TypeScript | Tailwind CSS | Shadcn/UI | Node.js | Fastify | Express | PostgreSQL | Prisma ORM | Drizzle ORM | pgvector | Better Auth | BullMQ | Redis | WebSockets | Turborepo | Docker | Git | GitHub | REST APIs | Authentication | Database Modeling | AI Integration (LLMs, Vision & Embeddings) | SSR | Zod | Vercel | Swagger | Frontend Architecture | Stripe | Backend Development | SaaS Development

EDUCATION

Associate Degree in Systems Analysis and Development, Estácio de Sá University, Brazil (Jan 2022 - Dec 2025)

CERTIFICATIONS, LANGUAGES & ADDITIONAL INFORMATION

Anthropic: Claude Code in Action (2026) | **IBM:** Lifelong Professional Skills (2026) | **Google:** Google Analytics Certification (2026)

English: Professional Working Proficiency | **Português:** Native
